Six weeks after petrol prices fell to below £1 a litre on supermarket forecourts, the UK average has yet to fall to that level. AA analysis has found that potential price cuts from the lower cost of oil have been lost in commodity market prices that have failed to fall in line with oil.

**Unleaded** prices have dropped 2.2p from 104.4ppl to 102.2 ppl. **Diesel** prices have fallen back 5.1p from 107.7 ppl to 102.6 ppl. The price difference between diesel and unleaded is just 0.4 ppl.

The North West, West Midlands and Scotland have recorded the highest price for **unleaded** at £102.6 ppl. East Anglia and Yorkshire & Humberside have recorded the lowest price for **unleaded** at £101.9 ppl. The North and Scotland have recorded the highest **diesel** price at £103.1 ppl. Northern Ireland has the cheapest **diesel** at £101.6 ppl.

Supermarket prices for **unleaded** remain at 99.9 ppl. The gap between supermarket prices and the UK average for **unleaded** has shrunk to 2.3 ppl.

Note: We receive international prices to 3 decimal places and calculate the UK pence per litre on that price. Therefore, some countries will show the same price in their local currency to 2 decimal places, but the UK pence price could be slightly different. Please note the unleaded prices for France, Germany and Finland are for E10. That’s petrol containing 10 per cent ethanol.
